Introduction

Roberto Lauro graduated in Electrical Engineering from the University of Bologna in 1947, then known as 'large current' engineering. In 1948, he was hired by Ansaldo San Giorgio, starting as a factory worker and specialising as a technical expert, and eventually rose to management positions and was appointed director of the ASGEN plants in Genoa Campi and the Ansaldo plants in Genoa.

His career has always been aimed at personal and corporate improvement by pursuing innovation and sensing the advancement of manufacturing.

Indeed, he strongly supported Ansaldo's participation in the Hydroart consortium for the development of high-power turbines and alternators, and promoted Ansaldo's entry into the field of superconducting magnets.
